

Agyei Lomini

Gameplay Programmer — Combat & Systems · State Machines · Enemy AI · Tooling

Metro Atlanta, GA | agyeilomini@gmail.com | (404) 923-0440 | zeroscapez.github.io | github.com/Zeroscapez | linkedin.com/in/agyei-lomini | crestoriashiro.itch.io

SUMMARY

Unity/C# gameplay programmer with a Computer Science degree and a Game Design & Development minor. I build the systems that make games feel good to play — state-machine combat, data-driven enemy AI, player mechanics, and the tooling that keeps a team iterating fast. Comfortable owning a feature from prototype to polish and integrating middleware like FMOD and Yarn Spinner. Founder of the indie studio Black Star Creatives.

SELECTED PROJECTS

Crystal's Debut ★ **Pirate Jam 18 Winner** Lead Programmer · Lead Designer · PM

A livestreaming sim where you play Crystal, managing viewer requests in real time to hold your approval rating. · Unity · C# · Yarn Spinner 3 · FMOD

- Programmed the core streaming-simulation loop — a real-time viewer-request queue and an in-game messaging-app manager driving live approval-rating feedback.
- Implemented devotion/karma state systems, integrated FMOD for adaptive audio, and built a debug overlay to accelerate team iteration.

Vampiric Ascension Lead Programmer · Lead Designer · PM

A Touhou-inspired bullet-hell built for Bullet Jam 2025. · Unity · C# · Combat AI

- Architected a finite-state-machine combat system and a modular, data-driven enemy AI framework, letting designers compose new bullet patterns and behaviors without code changes.

Inverse Lead Programmer · Designer · PM

A 3D puzzle platformer spanning two mirrored worlds. · Unity · C# · 3D

- Programmed dual-character traversal and a light-refraction mechanic that gates progression by physically linking the two mirrored worlds.

Project: Cultivation Lead Programmer · Designer · PM

A side-scrolling shooter following pilot 41155A-Alissa through experimental environments. · Unity · C#

- Built the core movement and shooting systems and a time-manipulation mechanic used to solve environmental combat encounters.

Project Gold (in development) Black Star Creatives · Programmer & Systems Design

A single-player turn-based action RPG dungeon crawler with a Seven Deadly Sins-driven emotion system. · Unity · C# · Systems Design

- Designing and prototyping turn-based party/partner combat, per-character sin arcs with Resolute states, and detailed systems specs feeding an AI-assisted implementation pipeline.

EXPERIENCE

Black Star Creatives — **Founder** 2026 – Present

Independent game studio · Metro Atlanta

- Founded and lead an independent game studio, owning design, systems programming, and production across original titles.
- Set technical and design direction and coordinate collaborators, carrying projects from concept through playable prototype.

TECHNICAL SKILLS

Languages C# · Java · JavaScript · Dart · HTML

Engines Unity · Unreal Engine (Blueprints)

Gameplay State machines · Enemy AI · Combat systems · Player mechanics · Debug tooling

Web / Data React · Node.js · AWS · SQL · PostgreSQL · Firebase · MySQL

Tools Git · GitHub Actions · FMOD · Yarn Spinner · MySQL Workbench · phpMyAdmin

EDUCATION

Georgia State University 2021 – 2024

B.S. Computer Science, Minor in Game Design & Development · Magna Cum Laude · 3.80 GPA
